excerpt from japan by the japanese a survey by its highest authorities it was with a knowledge of this need and the impossibility of any foreigner to supply it that i conceived the idea of inducing the japanese to do it themselves i went to japan for this purpose and suggested to several of their leading men that they should undertake the production of an authoritative account of their country for the information of the outside world the idea was taken up with enthusiasm and at a gathering in tokyo i was honoured by being requested to undertake the collecting editing and arranging of the work i mention this because i feel that i owe the readers of this book some explanation as to why the name of a non japanese appears in a book which as its very title makes clear is written by the japanese the difficulties of collecting the materials for such a book were not small and much time had to be spent in the work the war and the necessary preparations for the war prevented some of the contributions arriving and changes were made necessary in others at best the book must be considered as a trial essay to be improved and enlarged later nobody can be more aware of its omissions its faults than myself to whom indeed to a certain extent many of them are due but as it stands i venture to claim that it is a unique work of great interest to have secured the record of a country s progress written by the men who are now guiding her destinies is no small thing and in no other great country would it have been possible some of the statesmen who responded to my appeal for special contributions have selected their most important public utterances for inclusion in the book this they have done because they felt that in these deliverances they had expressed their views on vital national questions so thoroughly that to write on them again would only entail repetition about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
